

HIGH CALCIUM AG LIME

PRIME YOUR FIELDS. MAXIMIZE YOUR YIELDS.™

PRODUCT INFORMATION

Typical Ranges

High Calcium Ag Lime

Chemistry

93% -97% CaCO_3
95-99% CCE

Sizing

85-97% Passing 100 Mesh

Dolomitic Ag Lime is available at certain locations, contact us for specs and availability.

Product specifications vary by location. For the product typicals for a specific location, please contact us at: salesinquiries@carmeuse.com

Farming today is a complex business with a variety of needs. Whether it is increasing the pH of your soil, managing the health of your animals, controlling animal waste for odor control, or maximizing your yields, we understand that turning a profit is your number one priority.

WHY HIGH CALCIUM AG LIME?

Our high calcium ag lime raises your soils' pH and provides available calcium and magnesium nutrition to your crops. Ag lime optimizes your soil condition by improving chemical and physical properties, such as: pH, structure, water infiltration and retention, drainage, fertilizer optimization, and aeration. High calcium ag lime is your long-term solution for improving crop output. This results in less fertilizer needed and reduced fertilizer runoff, all while improving your yield.

High calcium ag lime serves as a solution for:

- Raising soil pH
- Improving root structure for healthier crops
- Improving drainage and removal of phosphorus nutrients

No High Calcium Ag Lime Added

Addition of High Calcium Ag Lime*

*Tons per acre is proportional to specific needs based on soil and crop type

PRODUCT BENEFITS

- Neutralizes acidic soils creating the best growing environment for your crops
- Allows for improved root structure ensuring healthier crops
- Enhances nutrient availability to improve your yields
- Nutrient availability optimizes fertilizer, saving you money
- Economical and easy to apply, putting more profit in your pocket
- Product where and when you need it with our network of ag lime sources
- When needed, liming returns \$5-\$10 per dollar spent according to UW Extension's "Ag-lime Key to Increased Yields and Profits" by Schulte and Kelling
